Date	Revision	Notes
23/04/2019	1.0	First Release

Module Versions

This version of the CTX-PRTG deployment plan is relevant up to version 1.0 of the CTX-PRTG module.

1   Requirements

This document details all the steps required to deploy the PRTG Subtasks.

Requirements:

- An instance of PRTG running on the target server

- Cortex connectivity to PRTG server

- Cortex v6.4 Installed on the Cortex Server

2 Import CTX-PRTG

To deploy the CTX-PRTG module on your Cortex system, the CTX-PRTG Studio Package needs to be imported on your Cortex system. To do this:

- Download the CTX-PRTG Studio Package

- Import the Studio Package in Cortex Gateway

- Ensure the relevant users have the required permissions in 'Studio Authorisation'

After this, all users in the authorised groups will be able to view and execute the subtasks.
